Employee Assistance Program

Caring for yourself and your family

Our Employee Assistance Program, offers a wealth of information, support, and resources, whether you need help managing stress or managing relationships, getting back on track or getting out of debt.

Services are confidential and available at no cost to you. EAP services can meet the needs of you and your family members for short-term counseling through in-person EAP sessions and toll-free telephone access to clinicians. Caring and empathetic counselors conduct assessments, provide referrals, identify and order resources, develop action plans, and follow up through case resolution. **Please read the following for contact information for the EAP at your ministry.**
